FLOWCORE[®] RAPTOR SERIES

THE MULTI-POINT CHEMICAL METERING & INJECTION SYSTEM

The FlowCore[®] Raptor Series utilizes one controller, one dual-headed pump (or two pumps for greater output) and a modular manifold to bring intelligence, precision, and reliability to multi-point injection applications.

Utilizing our sophisticated multi-patented technology, the Raptor precisely injects, monitors, and records doses accurate up to a hundredth of an ounce.

With low cost and extreme ease of use, the Raptor breaks the barrier in simplifying target dose calculations and attaining true chemical injection optimization every day.

Gain visibility of your chemical program while decreasing your footprint, man hours, and failure rates.

Specifications:

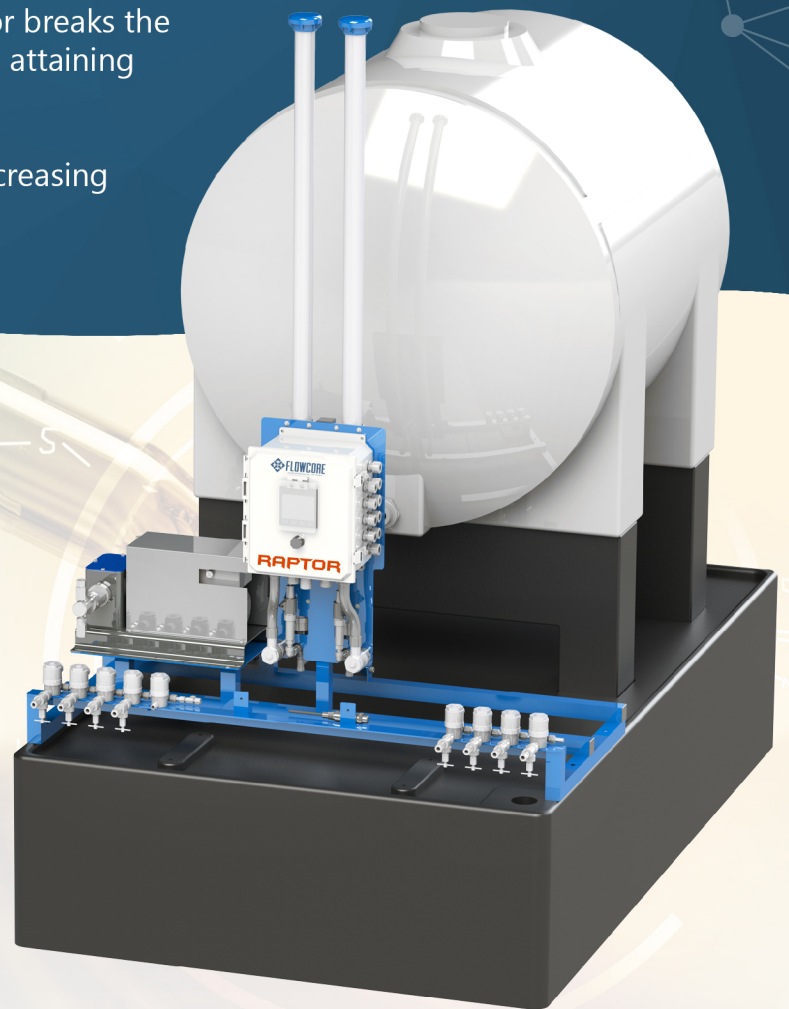

- 1 Chemistry
- 1 to 8 Ports
- 1 or 2 Pumps
- 110VAC or 24VDC
- General Purpose or C1D2

Features:

- User-friendly color touch screen display
- Precisely compensates injection for changes in temperature, pump performance and port to port pressure differentials

Communication Options:

- SCADA (TCP/IP, Modbus, etc.)
- FlowSite (online platform)

"If you can't measure it, you can't manage it."

- Peter Drucker
