## SYSTEMS

### FLOWCORE® SCORPION SERIES

THE DUAL-CHEMISTRY MULTI-POINT CHEMICAL METERING & INJECTION SYSTEM

The FlowCore® Scorpion Series is a dual-chemistry sister product to the Raptor Series. Utilizing a single controller, one dual-headed pump (or two pumps for greater output), the Scorpion brings intelligence, precision, and reliability to dual-chemistry multi-point injection applications.

Utilizing our sophisticated multi-patented technology, the Scorpion precisely injects, monitors, and records doses accurate up to a hundredth of an ounce.

With low cost and extreme ease of use, the Scorpion breaks the barrier in simplifying target dose calculations and attaining true chemical injection optimization every day.

Gain visibility of your chemical program while decreasing your footprint, man hours, and failure rates.

#### Specifications:

- 1 or 2 Chemistries
- 1 to 8 Ports
  - Manifold A: 1 to 4 Ports
  - Manifold B: 1 to 4 Ports
- 1 or 2 Pumps
- 110VAC or 24VDC
- General Purpose or C1D2

#### Features:

- User-friendly color touch screen display
- Precisely compensates injection for changes in temperature, pump performance and port to port pressure differentials

#### Communication Options:

- SCADA (TCP/IP, Modbus, etc.)
- FlowSite (online platform)

*"If you can't measure it, you can't manage it."*

- Peter Drucker
